

Saint Barnabas Medical Center and Barnabas Health Ambulatory Care Center

Vol. 18 Issue 34 • August 31, 2018

A Message from the President and Chief Executive Officer

Congratulations to Thad Denehy, MD, Associate Director and a physician in the Division of Gynecologic Oncology and Reconstructive Surgery, who performed his 1,000th robotic surgery case at Saint Barnabas Medical Center on August 23. We are proud and grateful to have Dr. Denehy as a member of our Medical Staff.

Recently, our Renal and Pancreas Transplant Program was featured in a national piece on *PBS News Hour*, addressing the unique economic principle that powers the kidney donor market, particularly the concept of paired kidney exchange. Shamkant Mulgaonkar, MD, Chief, and Marie Morgievich, APNC, CCTC, Director of Clinical Services and Living Donor Institute, were interviewed regarding our expertise and innovations in the field, which position us as one of the largest kidney transplant programs in the country and helped us set the record for having the longest living donor chain. To watch the piece, please visit goo.gl/yWo8Sc.

PARTNERSHIP INSIGHTS

In July, RWJBarnabas Health and Rutgers University announced the official launch of their public-private partnership to jointly operate a world-class academic health system dedicated to life-changing research, clinical training of tomorrow's health care workforce, and high quality patient care, consistent with the missions of Rutgers and RWJBarnabas Health. By working together, these two higher education and health care industry leaders will enhance research and medical and health professional education, improve access to care, and reduce health disparities in New Jersey. Each week, we will break down what this partnership means to the System and to the affiliate hospitals.

How are the RWJBH and Rutgers medical groups affected by the partnership? Key among the transformative efforts of the partnership is the formation of a comprehensive medical group comprised of employed physicians and other health care professionals from RWJBarnabas Health and Rutgers Health. When finalized over the coming months, our new medical group – one of the largest in the country – will have a unified clinical mission that complements the high quality standards of teaching and research excellence.

Thad Denehy, MD, Hits Robotic Surgery Milestone

On August 23, Thad R. Denehy, MD, (pictured below, center) renowned gynecologic oncologist, performed his 1,000th robotic surgery case at Saint Barnabas Medical Center. Associate Director and a physician in the division of Gynecologic Oncology and Reconstructive Surgery at the Saint Barnabas Medical Center, Dr. Denehy has extensive experience treating patients with gynecologic cancer and other complex gynecological conditions. Thank you to the Operating Room nurses who organized a special party to celebrate this important milestone.

Back to School Supply Drive

School Supply Drive

The Food and Nutrition Department is holding a school supply drive to help children in our local communities have a happy successful start for the new school year. Collection bins will be located at the Cafeteria entrance on the Ground Floor through September 15. Any and all items are greatly appreciated.

Labor Day Cafeteria Schedule

On Labor Day, Monday, September 3, the cafeteria will be open from 6:30 to 10:30 am and 11:30 am to 2:00 pm. Fresh City will be open from 2:00 to 10:00 pm and offer a 10 percent discount to SBMC employees.

President's Message

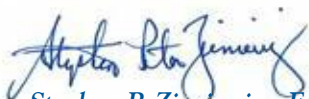

continued from page 1

Last week, I had an opportunity to shadow Lalitha Murugan, MD, a first year Internal Medicine resident at Saint Barnabas Medical Center from India. Shadowing Dr. Murugan provided me the unique opportunity to experience first-hand the hospital environment through the eyes and experiences of a new physician. Several areas of improvement were identified including additional training and orientation prior to a resident's start date, allowing more time for thorough review and practice. Dr. Murugan felt doing so will result in better preparation and more efficient use of their time. Also the resident team room will have several upgrades including the addition of computer work stations.

Thank you to those who took part in our blood drive on August 21. We collected 43 units. As the nation faces a low blood supply, your help was vital as this is the time of year where we traditionally see an increase in trauma cases necessitating blood resources.

All are welcome to join us in celebration of the retirement of H. Mahmood Cheema, MD, Chairman, Orthopedics, who will be leaving us after 45 years of dedicated service with the organization. The reception will be held in the Islami Auditorium on September 5, 2018 from 11:30 am to 2:00 pm.

I wish you and your family a happy and safe Labor Day weekend.

Stephen P. Zieniewicz, FACHE
President and CEO

Fall Continuing Medical Education Programs

To learn more and register for any of these continuing education programs, visit rwjbh.org/events and search for the program name.

Intersections in LGBTQ Health: Scientific Advances, Social Norms and Humanism in the 21st Century

October 20; 8:00 am to Noon

The Heldrich Hotel, 10 Livingston Avenue, New Brunswick

Registration information to follow.

This Month's Breakfast With the CEO

Thank you to all those who attended this month's "Breakfast with the CEO." Your participation and thoughtful feedback and input is very much appreciated.

High Reliability Training for All Employees Extended

To ensure all employees attend in-depth training in support of RWJBarnabas Health's continuing journey to become a high-reliability organization (HRO), additional sessions have been added through September (including Saturday, September 15 and 22). It is important to note that attendance is mandatory and must be done in person. For additional dates and times and to register, look in NetLearning, under "SBM1 High Reliability Training 2018." While it is the responsibility of each employee to register for a session, they should speak with their supervisor to determine if they can attend a session during their regular work day or if they will need to be scheduled on an off day. The training will provide an understanding of our individual role in preventing human error, as well as detecting and correcting system weaknesses that lead to harm. Additionally, we will learn specific, standardized error prevention behaviors and be expected to use them in our day-to-day job functions.

Physician Healthcare Excellence Quarterly Award 2018

The Physician Collaborative Committee is now accepting nominations for the 2018 Physician Healthcare Excellence Award through September 22. The recognition is designed to honor members of the SBMC Medical Staff for clinical excellence, professionalism and embracing the values of compassionate care, healthcare excellence and superior service for our patients and their families. Candidates should also contribute to the SBMC's patient safety and quality goals by exhibiting a personal commitment and demonstrating leadership in contributing to healthcare excellence.

To learn more and for a nomination form, visit the SBMC portal and search for "Physician Excellence Award."

Community Health & Outreach Corner

Programs, Classes, Fundraisers and Health Fairs
